API INTEGRATION (ZSH – API)

Zennio Suite Hotel – Application
Programming Interface

Limitless integration
between hotel applications

API allows all third-party
services to share
information and work
together

PROJECT DESIGN & REMOTE SUPPORT

Our design team works closely with your designers, architects and consultants to meet your specifications.

Our dedicated remote support team ensures your hotel is always working.

SUSTAINABILITY

Energy efficiency

CO2 footprint reduction

Cutting running costs

Preventive maintenance

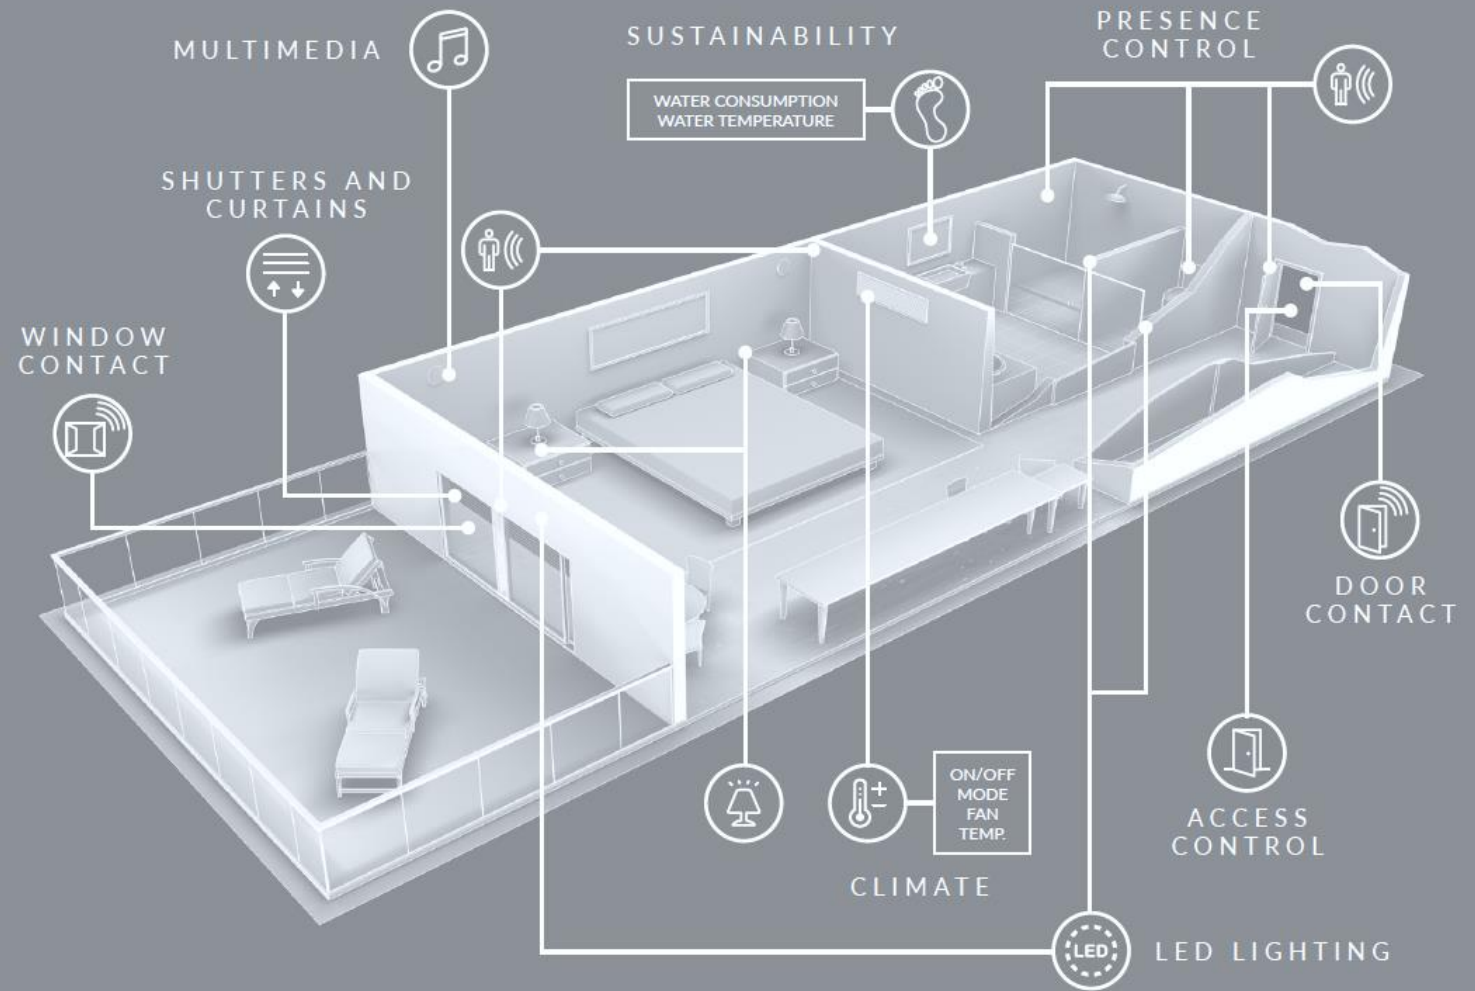

Happy customers...

...it's all benefits.

THE SOLUTION

Zennio's Hotel Solution combines the outstanding control properties of KNX with the scalability of IP networks and the opportunities of API integration

DESIGN

Fully customizable switches to meet every design

&

Flexibility to combine with your favourite finishes*

*Zennio solutions can be installed in combination with conventional switches

OUR COMMITMENT

We are committed to provide technological products and services to support the hospitality industry closely collaborating with our customers all over the world...

Lopesan Costa Bávaro (Punta Cana – DR), with over 1,100 rooms, includes a complete automation solution by Zennio
